APRIL 2021

Welcome to Hackathon #1 Zherkin

THE POINT OF TODAY

- Have fun
- Play with new tech
- Meet new people
- There's no test at the end

The Challenge 🤥

Backstory

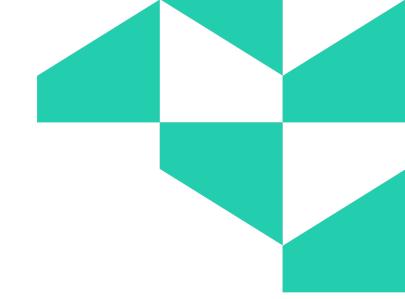

- We often use Gherkin scenarios as requirements
- Gherkin scenarios are source controlled when used as a part of an automation framework

Problem

 How can we share these source-controlled files with product owners so they can view, navigate and search these Gherkin feature files in a nice way

Solution

- Up to you!
- We have some Gherkin feature files for you to use as "input"
- We have a sample design you can use, if you want

So how will this work?

- We've put you all into random teams
- Feel free to work however you want, the team is the starting point
- Work separately (if you want) but bouncing ideas about
- Feel free to swing by other teams to see what others are doing
- Share screen shots and progress in the #zherkinhackathon channel
- Adam and Jacob will be facilitating and answering questions during the session

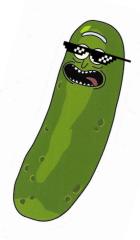

Timings

12.30 – introduction and team hellos

12.45 – get started with some hackin'

16.15 – regroup and discuss what you've done (if you want)

16.30 - finish

See you on the other side
Thanks for joining! #
